

Canon ScanFront client

Global Deployment
with a click

The wait is over, our new **Canon ScanFront** client has finally arrived.

Our device clients have been redesigned to take full advantage of the trend in the industry with MFP screen sizes and resolutions, as well as technical advances which makes the operation and use of our products quicker and more functional for **Canon ScanFront**.

We are confident that it will cater to all your functional needs. The **Canon ScanFront** client enables a seamless user experience and will indisputably excite the market.

Deploy Anytime, Anywhere

Our client is implemented through **ScannerVision™**, fully configured to multiple devices. Our objective is swift deployment at your convenience.

Cost Efficiency

As for requirements, there are none! Our client does not require a Java-Card to deploy, hence making it effortless for seamless integration. This is great as it saves you precious time and resources.

Enhanced Flexibility

Flexibility is key when it comes to complex features. We are proud to inform you that our client has a superior feature, whereby Sharepoint can be browsed on multiple level folders as opposed to merely the first level. It's simple, fast and easy.
