Document Automation for the Education Industry

Your solution in documents automation.

The Education Industry

More on the journey of accquiring knowledge, less with the hassle with the housekeeping.

"Most Teachers and School / University members spend the majority of their time in the classroom or preparing for classroom activities. Taking attendance, dealing with homework assignments, and managing other administrative items can cut into as much as a third of class time on the middle and high school levels, not even mentioning the time spent on grading student work by evaluating the quality of students' papers and tests.

These tasks involve many pieces of paper from Physical (Paper) documents and nowadays even Electronic documents received via Email. ScannerVision can provide software solutions for the Education Sector by streamlining day to day responsibilities, giving teachers more time to focus on what really matters, their students. "

Common Challenges:

Public, private, and even higher education institutes are burdened with more paperwork than ever before, which leaves schools straining to keep up. Managing paper archives, dealing with paper-based business processes while struggling to comply with regulations, manual paper processing and storing of documents (i.e. Exam Papers, Student Final Marks, Degrees etc.) as well as documents being received by different Schools / Universities in many formats and in many ways can be a tedious task and a headache for any administrator.

From Student records to Educational Files every document needs to be kept in a safe and secure environment just in case it needs to be re-issued to the student on a later stage. The question is why not digitize?

How **ScannerVision™** and aivika solutions can help

ScannerVision™ and **aivika** can help the Education Sector by allowing documents to flow around the School / University using a unified interface and templates that are customizable to each class, department and Student.

ScannerVision™ and **aivika** can revolutionize the education system in every way, from streamlining homework assignments & marking using OMR (Optical Mark Recognition) to archiving hardcopy paper documents for longevity purposes.

Student files, can be scanned in from an MFP (multi-function device), sent via email, even uploaded from a mobile device, which is great for Students that are always on the move. Mandatory information can also be added by way of answering questions that are sent with the document and processed, this is called metadata. This metadata can be used for many things, from naming a document to updating a database or other system with information about the Document and or Student.

**ScannerVision™ and aivika
"Building better solutions"**

The benefits our solutions can provide to the Education Industry:

ScannerVision™ solutions help you reduce costs, improve staff productivity and provide superior service to departments, students and parents.

- Time saving
    - Capture student ID's to automate filing and records processing.
    - Standardize document enrichment on every document type.
    - Fast processing with 'Parallel Processing' (more than one document at a time).
    - Automate document enrichment using OMR (Optical Mark Recognition), forms recognition, zone OCR, barcode/QR reading.

- Cost Savings
    - Simplify scanning and save staff time.
    - Speed the financial aid process with Workflow automation.
    - Minimize development time by utilizing built-in editors and existing connectors.
    - Automated document transformation into a format that is required by other departments or School / University systems.

- Efficiency
    - Store Exam Papers, Final Marks and Student Degrees.
    - Enhance student services.
    - Effective management of Physical and Digital Documents utilizing the same workflows.
    - Enable Single Sign On combined with existing security & cost control tools such as MyQ, Papercut and Equitrac.
    - Apply scanning policies to specific School / University departments and enable secured document workflow processes.
    - High-speed and high-quality document scanning, processing and uploading from various sources.
    - Students and School / University members can scan their documents from home or on-the-go as they would in their office using **aivika** mobile clients.

- Customisation
    - Quickly adapt to changing requirements by utilizing the SQL, PowerShell and C# modules.
    - Easy to configure, 'bi-directional' connectors.
